

## **M2: How microplastics pollution in soil is perceived by the society**

Organisers: Violette Geissen<sup>a</sup>, Esperanza Huerta Lwanga<sup>a</sup>

<sup>a</sup> WUR, Soil Physics and Land Management Group, The Netherlands

Every person in the world is aware of the plastic pollution in the ocean, but really few of them know about the microplastic pollution inside the soil.

The purpose of this master class is to show the problem, how some of the soil functions are affected with the presence of soil microplastic pollution and to recognize some technics of plastic identification in soil.
